EMMANUEL MAGOMU

Data Scientist and Analyst

eimahmagomu@gmail.com +256 765 205 619 Kampala, Uganda Ehmahm

Profile

Second-year Data Science and Analytics student with a strong foundation in programming, statistical analysis, and business intelligence. Experienced in Python, SQL, and Power BI, with hands-on project work spanning machine learning, forecasting, and data visualisation. Passionate about applying data-driven solutions to real-world challenges, particularly in health and community development contexts. Brings both technical ability and a collaborative mindset.

Education

BSc in Data Science and Analytics *May 2024 – Present*
Uganda Christian University *Mukono, Uganda*

- Cores: machine learning, database systems, networking, business intelligence
- Active research on machine learning approaches for chronic disease detection in Uganda, supervised by faculty mentors

Professional Experience

Network attendant *2024 – 2025*
Sunshine Network Solutions *Bugolobi, Kampala*

- Managed daily network troubleshooting
- Basic computer repair and maintain
- Bill customers for internet usage

Cashier *2023 – 2024*
Portbel Supermarket *Portbell, Kampala*

- Managed daily cash sales and balancing
- Maintained accurate transaction records in a retail

Community outreach volunteer *2020 – 2021*
Red Cross Uganda *Ntinda, Kampala*

- Educated peers about prevention methods
- Carried out door to door community outreachs.

Projects

Machine Learning-Based Chronic Disease Detection in Uganda using algorithms. *Jan 2026 – Present*

- Applying classification algorithms (Logistic Regression, Random Forest, SVM, XGBoost) to predict chronic disease prevalence among the local Ugandan population
- Conducting end-to-end pipeline: data preprocessing, model training, evaluation, and interpretation

Telco Churn & HR Attrition BI Dashboards *2025*

- Built interactive Power BI dashboards visualising churn patterns and HR attrition trends
- Designed data models and DAX measures to support business decision-making

Stock Market Price Forecasting Model *2025 – Present*

- Developed a forecasting model leveraging Bayesian probability, Expected Value filtering, and Half-Kelly position sizing
- Focused on risk-adjusted signal generation for financial markets

Skills

Data Analysis	Pandas, NumPy, Scikit-learn, Matplotlib
Visualisation	Power BI, Matplotlib, data storytelling
Machine Learning	Classification algorithms, supervised learning pipelines
Programming	Python, MySQL, Java, C++, React/ReactJS
Networking	Troubleshooting, network setup (Cisco certified)
Tools & Platforms	Git/GitHub, Oracle Cloud, Docker (basic)

Certificates

- **Practical Technical Recess Training**
  Uganda Christian University, Dept. of Computing & Technology
  Competencies: Local Area Networking, Computer Hardware Repair & Maintenance, Printed Circuit Board Design & Simulation, Embedded Systems, Technopreneurship & Project Management, 3D Modelling & Simulation, Writing & Scholarly Skills, Domestic Electrical Installation

- IT Essentials — Cisco Networking Academy
- Python Essentials — Cisco Networking Academy
- Cybersecurity Administration

Extracurricular Activities

- Gaming and Robotics chapters
- Virtual reality and augmentation
- Cloud computing exploration
